Mehul Nikumbh

Long Beach, CA | +1-562-280-6133 | mnikumbh19@gmail.com | LinkedIn | GitHub | Portfolio

Education

California State University, Long Beach *Aug 2024 – May 2026*
Master of Science, Information Systems (Cybersecurity) | GPA: 3.44 *Long Beach, CA*

University of Mumbai *Feb 2020 – May 2024*
Bachelor of Engineering, Electronics (Honors: Cybersecurity) | GPA: 3.8 *Mumbai, India*

Experience

GRC / Cybersecurity Analyst Intern | The Cheesecake Factory *Jun 2025 – Aug 2025*

- Executed **1LOD** Third-Party Risk Management (**TPRM**) reviews on **6+** SaaS vendors, evaluating **SOC 2** reports, OAuth scopes, SSO/MFA, and IAM against vendor risk criteria; documented Complementary User Entity Controls (**CUECs**), compensating controls, and evidence obligations for vendor owners.
- Performed **1LOD ITGC** control testing on firewall, SIEM, and endpoint configurations against **CIS Benchmarks** and internal baselines; validated control evidence and effectiveness, cataloged **12** control gaps with severity ratings, control owners, remediation timelines, and risk acceptance status.
- Coordinated IT security communications for stakeholders on control gaps, remediation status, and evolving risk trends; translated technical findings into audit and regulatory evidence packages for internal reviewers.
- Executed an end-to-end phishing simulation across departments and analyzed user-reported emails; generated KRIs from click-through trends, report rates, and response gaps.

Security Analyst | VESIT (University of Mumbai) *May 2023 – Aug 2024*

- Performed security risk assessments and control gap reviews across applications, systems, and processes mapped to **NIST CSF**, **ISO 27001**, and **CIS Controls**; documented findings with risk ratings and owners.
- Maintained **ITGC** control-evidence completeness and accuracy across a **200+** endpoint asset inventory using **Wazuh SIEM** and Windows Event Logs, collecting access reports, configuration exports, and policy documents on a quarterly audit-readiness cycle.
- Evaluated vulnerability reports, using **OpenVAS** and **Nmap** to support evidence collection, and validated findings against **CIS Benchmarks**.
- Conducted Vendor **SOC 2** and **ISO 27001** certification reviews, evaluating Complementary User Entity Controls (**CUECs**) and vendor risk posture; managed annual renewal and follow-up requirements in partnership with vendor owners.
- Tested IAM **ITGC** controls (privileged access, provisioning/de-provisioning, terminated-user review) and maintained the **1LOD** risk register and risk acceptance documentation with likelihood/impact ratings, control owners, and remediation status.

Security Operations Analyst | Telenetworks Technologies *Dec 2022 – May 2023*

- Reviewed baseline configurations for **25+** systems against **ITGC** and **CIS/NIST** hardening standards; cataloged **8** deviations with risk impact, assigned owners, and target remediation dates.
- Examined **200+** security event logs across endpoint and network to identify control deviations and evidence requiring follow-up.
- Maintained remediation trackers for configuration anomalies, open findings, and control gaps; reduced unresolved findings by **35%**.
- Prepared audit and regulatory evidence packages for **4** compliance assessments (configuration exports, access logs, control test results, and closure documentation) supporting external auditor and regulator information requests.

Skills

- **GRC & Audit:** IT Governance, IT Policy Management, ITGC, 1LOD Risk Management, Control Testing, Control Assessment, Evidence Collection, Gap Analysis, Risk Registers, Risk Acceptance Documentation, IT Asset Management (ITAM), CMDB, TPRM, Vendor SOC Reviews, CUEC, IAM, Audit & Regulatory Support, Remediation Tracking, Continuous Monitoring, KRIs, SoD, CAPs
- **Frameworks:** NIST (CSF, RMF 800-37, SP 800-30, SP 800-53), CIS Controls/Benchmarks, ISO 27001/27002, ISO 27005, SOC 2 Type I/II, Trust Services Criteria, PCI DSS, GDPR, HIPAA, COBIT, CCM, ServiceNow GRC (IRM), AuditBoard, MetricStream
- **Technical:** AWS (CloudTrail, S3, IAM, boto3), Azure, Microsoft Word / Excel / PowerPoint, Python, pandas, SQL, Wazuh SIEM, OpenVAS, Nmap, CVSS

Projects

- **BASTION** – Python/**pandas** workbook mapping **120+ NIST SP 800-53** and **CIS Controls** to policies, evidence sources, and control owners; ran **NIST SP 800-30** gap analysis across **5 ITGC** control families, converting **28** evidence gaps into corrective action plans with risk treatment and closure tracking.
- **NIMBUS** – Python pipeline parsing **AWS CloudTrail** logs via **S3**, **IAM**, and **boto3** to monitor identity governance controls (root usage, MFA-less logins, and IAM policy changes); mapped findings to **CIS AWS Benchmark** and applied a **scikit-learn** Isolation Forest to surface exceptions for analyst review.
