

MEHUL NIKUMBH

Cybersecurity GRC & Cloud Security Analyst

CA | 562-280-6133 | mnikumbh19@gmail.com | [Github](#) | [Portfolio](#)

SUMMARY:

GRC and Cloud Security Analyst with 3+ years of experience specializing in ITGC, control testing, cloud risk assessments, audit readiness, and security compliance across AWS, Azure, and GCP environments. Strong expertise in ISO 27001, NIST CSF, SOC 2, IAM, CSPM, ServiceNow IRM, SAP GRC, and cloud security governance, with hands-on experience in risk remediation, access reviews, and third-party risk. Proven ability to strengthen control effectiveness, streamline audit evidence collection, and support regulatory compliance across complex cloud environments.

SKILLS:

GRC, Risk & Audit: ITGC, Control Testing, Audit Evidence, Audit Readiness, Risk Assessments, Risk Register, Risk Treatment, Remediation Tracking, Third-Party Risk, Security Exceptions

Compliance & Frameworks: ISO 27001, NIST CSF, SOC 2, CIS Controls, GDPR, DPDP Act, CERT-In, IEC 62443

Identity & Cloud Security: IAM, Microsoft Entra ID, AWS IAM, Access Reviews, SAP GRC, SoD, CSPM, AWS, Azure, GCP, Kubernetes, Cloud Configuration Reviews, AWS KMS, Azure Key Vault

Tools & Reporting: ServiceNow IRM, ServiceNow CMDB, Power BI, Excel, SharePoint, Azure DevOps, Terraform, AWS CloudTrail, Snowflake, Databricks

EXPERIENCE:

BlackRock, CA | GRC Analyst

Mar 2026 – Present

- Triage Cloud Security Posture Management (CSPM) findings across AWS, Azure, and GCP environments, validating affected configurations, documenting control gaps, and tracking remediation through closure in coordination.
- Review AWS Security Group and Azure Network Security Group (NSG) rule sets, cloud segmentation, and micro-segmentation configurations to identify control deviations and validate encryption controls, including AWS KMS, Azure Key Vault, key-rotation, TLS, and data-at-rest encryption for SOC 1, SOC 2, and regulatory evidence collection.
- Perform security reviews of Terraform pull requests, triage container and Kubernetes security findings (misconfigured pods, overly permissive RBAC, exposed dashboards), and assess guardrail configurations including Azure Policy, AWS SCPs, and OPA Gatekeeper policies.
- Review AWS IAM and Microsoft Entra ID access assignments, including service principals, service accounts, orphaned identities, and excessive/standing privileges, supporting periodic cloud access certification campaigns and access-review processes.
- Support Aladdin client security due-diligence questionnaires, map cloud configurations to applicable security controls, and assist in cloud audit log collection (AWS CloudTrail, Azure Monitor, GCP audit logs) for incident timeline reconstruction and regulatory control testing.
- Maintain AI/LLM use-case inventory, support AI risk-intake assessments, verify AI data-flow and data-minimization practices, execute prompt-injection and AI guardrail testing based on predefined test plans, and map controls against NIST AI RMF, ISO 42001, and EU AI Act requirements.

Siemens, India | Cloud Security Analyst

Jan 2022 – Jul 2024

- Maintained ISO 27001 security documentation and Statement of Applicability (SoA) evidence for cloud and security controls, supporting audit readiness and compliance reviews.
- Executed assigned cloud security and ITGC control testing by collecting evidence, reviewing configurations, documenting control observations, and tracking remediation activities with control owners.
- Administered ServiceNow IRM and CMDB activities involving cloud-related asset inventory, classification, control mapping, and security documentation while coordinating quarterly access recertification activities.
- Reviewed SAP GRC Access Control results, Microsoft Entra access, segregation-of-duties (SoD) conflicts, mitigating controls, and firefighter access as part of established identity and access governance processes.
- Managed cloud-security risk-register updates and assisted with system and project risk assessments, security exceptions, compensating controls, risk treatment, and remediation tracking.
- Assessed third-party and supplier security documentation, including SOC 2 Type II reports and ISO 27001 certifications, supporting cloud vendor security due diligence and compliance reviews.
- Coordinated GDPR, DPDP Act, and CERT-In compliance activities while preparing cloud-security KPI reporting through Power BI and Excel, and assisting with ISO 27001 internal and surveillance audit activities.

EDUCATION:

Master of Science, Information Systems (Cybersecurity)

May 2026

California State University, Long Beach, USA

Bachelor of Engineering in Electronics (Honors: Cybersecurity)

May 2024

University of Mumbai, India

CERTIFICATIONS:

AWS Certified Cloud Practitioner | Microsoft SC-900 | Google Cybersecurity Professional | Microsoft AZ-900
